Ahmed Abdelrahman Elgamal

Full-Stack .NET Developer

+20 102 217 2951 | ahmed.elgamal.dev22@gmail.com | github.com/elgamalhub | linkedin.com/in/ahmed-elgamal1
Cairo, Egypt | Military Status: Completed | elgamalhub.github.io/devfolio

PROFILE

Full-stack .NET developer building production-shaped systems end to end - from database design and secure APIs to Angular interfaces and containerised deployment. I work with C#, ASP.NET Core, EF Core, SQL Server, Angular and TypeScript, with a focus on clean architecture, concurrency safety and automated tests. Recent work: EvTicket, NileLearn and this data-driven portfolio.

EXPERIENCE & TRAINING

Full-Stack Developer - .NET Track
Jul 2025 - Nov 2025

Intensive Training Program (ITP), Information Technology Institute (ITI) - Tanta

- Built full-stack apps with ASP.NET Core, EF Core, SQL Server and Angular across a 5-month intensive program.
- Designed layered architectures, REST APIs, JWT/Identity auth and integration tests in team Git workflows.

Full-Stack .NET Developer Track
Oct 2024 - May 2025

Digital Egypt Pioneers Initiative (DEPI), ITC College - Tanta

- Completed an 8-month .NET track covering C#, OOP, ASP.NET Core MVC, EF Core, SQL Server and front-end fundamentals.

Front-End Web Developer
Aug 2022 - Nov 2022

Future Work is Digital (FWD), Ministry of Communications and IT (MCIT) - Online

- Built responsive interfaces with HTML, CSS, JavaScript and Bootstrap, focusing on accessibility.

Front-End Web Developer
Jul 2021 - Aug 2021

Summer Code Camp, Information Technology Institute (ITI) - Mansoura

- Delivered a responsive multi-page project in an intensive team-based front-end bootcamp.

SELECTED PROJECTS

EvTicket - Event Ticketing Platform
2026

.NET 10 | ASP.NET Core | Angular 21 | EF Core | SignalR | SQL Server / SQLite | Docker | xUnit

- Guarantees no double-booking with atomic seat holds (`ExecuteUpdateAsync` + explicit transactions) and an xUnit test that reproduces the checkout race (200 / 409).
- Streams live availability over SignalR, expires abandoned holds in a background worker, and ships JWT auth with rotating refresh tokens, QR tickets, analytics, an admin console, OpenAPI docs and a single-container Docker image.
- **github.com/elgamalhub/EvTicketApi**

NileLearn - Learning Management System
2026

.NET 8 | ASP.NET Core | EF Core | Identity / JWT | SQL Server / SQLite | Paymob | Fawry | Kashier | Stripe

- Layered Domain / Application / Infrastructure / API solution covering course authoring, sections and lessons.
- Subscriptions, coupons and Egyptian gateways (Paymob, Fawry, Kashier) plus Stripe; chunked video upload with signed playback.
- Progress, certificates, quizzes, audit logs and role-based analytics; 11 passing unit and integration tests.
- **github.com/elgamalhub/NileLearn**

TECHNICAL SKILLS

Languages

C# | TypeScript | JavaScript | SQL | HTML | CSS

Backend

ASP.NET Core API | MVC | EF Core | LINQ | REST | SignalR | Identity / JWT | Clean Architecture | DDD | CQRS / MediatR | xUnit | Serilog

Data

SQL Server | T-SQL | SQLite | database design & ERD | EF Core migrations

Frontend

Angular 21 | RxJS | Bootstrap | SCSS | responsive UI

DevOps & Tools

Docker | GitHub Actions | Git / GitHub | Swagger / OpenAPI | Postman | Visual Studio | VS Code

EDUCATION

B.Sc. Computer Science

Zagazig University | Sep 2018 - Jul 2022

Grade: Very Good (B)

Graduation project: Mobile app detecting COVID-19 from X-ray images - Very Good (B)

LANGUAGES

Arabic	Native
English	Very Good (B2)

MORE PROJECTS

Bayan - Bilingual Publishing Platform 2026

.NET 8 | ASP.NET Core MVC | EF Core | Identity | SQL Server | Bootstrap (LTR + RTL)

- English/Arabic publishing platform with a rich-text editor, search, categories, comments, likes, author profiles and dark mode.
- Complete RTL experience: a culture cookie switches direction, dates and direction-aware Bootstrap assets; article HTML is filtered through an allow-list.
- Identity with Admin/User roles, antiforgery on every state change, and image uploads validated by extension, MIME type, size and file signature.
- **github.com/elgamalhub/bayan**

Devfolio - Developer Portfolio & CMS 2026

.NET 9 MVC | EF Core | SQL Server | ASP.NET Core Identity | Serilog | GitHub Pages

- Bilingual, data-driven portfolio whose public sections are managed from a protected admin studio; a static export pipeline publishes it to GitHub Pages.
- **elgamalhub.github.io/devfolio**

Netflix Clone - Streaming Platform 2025

ASP.NET Core | C# | Angular (Nx monorepo) | EF Core | SQL Server | SignalR | Stripe | Docker | GitHub Actions

- Full-stack streaming platform with DDD, CQRS/MediatR and a clean separation of layers.
- JWT authentication, subscription plans and Stripe payments; real-time notifications over SignalR.
- Admin dashboard with reports, pagination and filtering; containerised with Docker and built/deployed via a GitHub Actions CI/CD pipeline.

Job Portal System 2025

ASP.NET Core MVC (Razor Views) | EF Core | SQL Server

- Professional job portal connecting employers and job seekers with role-based management for Admin, Employer and JobSeeker.
- Company management, dashboards, CV uploads and end-to-end job application handling.

School Attendance System 2024

C# | Windows Forms | EF Core | SQL Server

- Desktop application for schools that automates attendance tracking and generates reports.
- Persistent storage and querying through EF Core and SQL Server.

PROFESSIONAL EXPERIENCE

Cashier - Awlad Eissa Trading Company Dec 2023 - Jul 2025

Zefta, Egypt

- Handled daily cash transactions and payment records for 200+ customers per day.
- Maintained 100% accuracy in cash reconciliation and end-of-day reporting, and coordinated with accounting on inventory and financial operations.

ENGINEERING FOCUS

I optimise for systems that are correct under concurrency and easy to change: explicit transactions and atomic updates where money or inventory is involved, thin controllers over testable services, and integration tests that encode real failure modes. I document APIs with OpenAPI, keep configuration out of source, and automate builds so every change is reproducible.

CERTIFICATIONS & PROGRAMS

- Full-Stack .NET Developer - ITI, Intensive Training Program (ITP), 2025
- Full-Stack .NET Developer - Digital Egypt Pioneers Initiative (DEPI), 2025
- Front-End Web Development - FWD / MCIT, 2022
- Summer Code Camp, Front-End - ITI, 2021

HIGHLIGHTS

- Integration test that reproduces and prevents double-booking under concurrent checkout.
- Bilingual (EN/AR) product surfaces with RTL support.
- Payment integrations across Paymob, Fawry, Kashier and Stripe.
- Secure video delivery with signed URLs and heartbeat progress.
- CI/CD with GitHub Actions and containerised deployment.
